DATE MAILED: 07/18/2003

Please find below and/or attached an Office communication concerning this application or proceeding.

Office Action Summary	Application No.	Applicant(s)	
	09/286,822	GRATE ET AL.	
	Examiner	Art Unit	
	Douglas B Blair	2142	

-- The MAILING DATE of this communication appears on the cover sheet with the correspondence address --

Period for Reply

A SHORTENED STATUTORY PERIOD FOR REPLY IS SET TO EXPIRE 3 MONTH(S) FROM THE MAILING DATE OF THIS COMMUNICATION.

- Extensions of time may be available under the provisions of 37 CFR 1.136(a). In no event, however, may a reply be timely filed after SIX (6) MONTHS from the mailing date of this communication.
- If the period for reply specified above is less than thirty (30) days, a reply within the statutory minimum of thirty (30) days will be considered timely.
- If NO period for reply is specified above, the maximum statutory period will apply and will expire SIX (6) MONTHS from the mailing date of this communication.
- Failure to reply within the set or extended period for reply will, by statute, cause the application to become ABANDONED (35 U.S.C. § 133).
- Any reply received by the Office later than three months after the mailing date of this communication, even if timely filed, may reduce any earned patent term adjustment. See 37 CFR 1.704(b).

Status

- 1) ☒ Responsive to communication(s) filed on 17 June 2003.
- 2a) ☐ This action is **FINAL**. 2b) ☒ This action is non-final.
- 3) ☐ Since this application is in condition for allowance except for formal matters, prosecution as to the merits is closed in accordance with the practice under *Ex parte Quayle*, 1935 C.D. 11, 453 O.G. 213.

Disposition of Claims

- 4) ☒ Claim(s) 1-39 is/are pending in the application.
- 4a) Of the above claim(s) _____ is/are withdrawn from consideration.
- 5) ☐ Claim(s) _____ is/are allowed.
- 6) ☒ Claim(s) 1-39 is/are rejected.
- 7) ☐ Claim(s) _____ is/are objected to.
- 8) ☐ Claim(s) _____ are subject to restriction and/or election requirement.

Application Papers

- 9) ☐ The specification is objected to by the Examiner.
- 10) ☐ The drawing(s) filed on _____ is/are: a) ☐ accepted or b) ☐ objected to by the Examiner.
- Applicant may not request that any objection to the drawing(s) be held in abeyance. See 37 CFR 1.85(a).
- 11) ☐ The proposed drawing correction filed on _____ is: a) ☐ approved b) ☐ disapproved by the Examiner.
- If approved, corrected drawings are required in reply to this Office action.
- 12) ☐ The oath or declaration is objected to by the Examiner.

Priority under 35 U.S.C. §§ 119 and 120

- 13) ☐ Acknowledgment is made of a claim for foreign priority under 35 U.S.C. § 119(a)-(d) or (f).
- a) ☐ All b) ☐ Some * c) ☐ None of:
1. ☐ Certified copies of the priority documents have been received.
2. ☐ Certified copies of the priority documents have been received in Application No. _____.
3. ☐ Copies of the certified copies of the priority documents have been received in this National Stage application from the International Bureau (PCT Rule 17.2(a)).
- * See the attached detailed Office action for a list of the certified copies not received.
- 14) ☐ Acknowledgment is made of a claim for domestic priority under 35 U.S.C. § 119(e) (to a provisional application).
- a) ☐ The translation of the foreign language provisional application has been received.
- 15) ☐ Acknowledgment is made of a claim for domestic priority under 35 U.S.C. §§ 120 and/or 121.

DETAILED ACTION

Response to Amendment

1. Applicant's request for reconsideration of the finality of the rejection of the last Office action is persuasive and, therefore, the finality of that action is withdrawn.
2. Claims 1-39 are currently pending in the application.
3. The declaration filed on 6/17/2003 under 37 CFR 1.131 is sufficient to overcome the O'Neill et al. reference (U.S. Patent Number 6,219,653).

Claim Rejections - 35 USC § 102

4. The following is a quotation of the appropriate paragraphs of 35 U.S.C. 102 that form the basis for the rejections under this section made in this Office action:

A person shall be entitled to a patent unless –

(e) the invention was described in (1) an application for patent, published under section 122(b), by another filed in the United States before the invention by the applicant for patent or (2) a patent granted on an application for patent by another filed in the United States before the invention by the applicant for patent, except that an international application filed under the treaty defined in section 351(a) shall have the effects for purposes of this subsection of an application filed in the United States only if the international application designated the United States and was published under Article 21(2) of such treaty in the English language.

5. Claims 1, 3, 8, 30, and 32 are rejected under 35 U.S.C. 102(e) as being anticipated by U.S. Patent Number 5,812,669 to Jenkins et al..
6. As to claim 1, Jenkins teaches a method for establishing a trading relationship between trading partners involved in electronic commerce, the method comprising: retrieving configuration details associated with a potential trading partner from a remote site (col. 6, lines 4-42); and automatically configuring a trading relationship with the potential trading partner using the configuration details (col. 5, lines 40-67).

Art Unit: 2142

7. As to claim 3, Jenkins teaches a method as recited in claim 1, wherein the automatically configuring comprises: creating a trading partner record (col. 6, lines 4-42); and automatically populating the trading partner record with the configuration details (col. 6, lines 4-42).

8. As to claim 8, claim 8 features the same limitations as claims 1 and 3 combined and is thus rejected on the same basis as claims 1 and 3.

9. As to claim 30, Jenkins teaches a method for establishing a trading relationship between trading partners involved in electronic commerce, the method comprising: retrieving configuration details associated with a first potential trading partner from a remote site by a second potential trading partner (col. 5, lines 40-67); retrieving configuration details associated with the second potential trading partner from a remote site by the first potential trading partner (col. 5, lines 40-67); and automatically configuring a trading relationship with the first and the second potential trading partners using the configuration details (col. 6, lines 4-42).

10. As to claim 32, Jenkins teaches method as recited in claim 30, wherein the automatically configuring comprises: creating a trading partner record; and automatically populating the trading partner record with the configuration details (col. 6, lines 4-42).

11. Claims 1-11, 13-17, and 19-29 are rejected under 35 U.S.C. 102(e) as being anticipated by U.S. Patent Number 6,490,567 to Gregory.

12. As to claim 1, Gregory teaches a method for establishing a trading relationship between trading partners involved in electronic commerce, the method comprising: retrieving configuration details associated with a potential trading partner from a remote site (col. 8, lines 36-52); and automatically configuring a trading relationship with the potential trading partner using the configuration details (col. 8, lines 53-67).

Art Unit: 2142

13. As to claim 2, Gregory teaches a method as recited in claim 1, wherein the retrieving comprises addressing a URL to access the configuration details.

14. As to claim 3, Gregory teaches a method as recited in claim 1, wherein the automatically configuring comprises: creating a trading partner record (col. 11, lines 13-25); and automatically populating the trading partner record with the configuration details (col. 11, lines 13-25).

15. As to claim 4, Gregory teaches an electronic commerce trading system involving exchanges of commerce information over a network, a method comprising: collecting configuration details associated with a trading partner participating in the commerce trading system (col. 6, lines 37-54); and publishing the configuration details to a Web site (col. 8, lines 26-35).

16. As to claim 5, Gregory teaches a method as recited in claim 4, wherein collecting comprises presenting a graphical user interface to enable a user to enter the configuration details (col. 6, lines 37-54).

17. As to claims 6, 9, 13, 14, 19, 20, 24, 25, 31, 37, and 38, claims 6, 9, 13, 14, 19, 20, 24, 25, 31, 37, and 38 are anticipated by Gregory for the same reasons discussed in the rejection of claim 2.

18. As to claim 7, Gregory teaches a method as recited in claim 4, wherein the Web site is associated with the trading partner (col. 8, lines 26-35).

19. As to claim 8, claim 8 features the same limitations as claims 1 and 3 combined and is thus rejected on the same basis as claims 1 and 3.

20. As to claim 10, claim 10 has the similar limitations as claims 4 and 8 combined and is thus rejected on the same basis as claims 4 and 8.

Art Unit: 2142

21. As to claims 11, 17, 23, and 34, claims 11, 17, 23, and 34 are anticipated by Gregory for the same reasons discussed in the rejection of claim 5.

22. As to claim 15, Gregory teaches a system comprising: a first computer system at a first trading partner; a second computer system at a second trading partner; a Web site (col. 8, lines 12-67); the first computer system collecting configuration details associated with the first trading partner and publish the configuration details to the Web site (col. 6, lines 37-54); and the second computer system retrieving the configuration details from the Web site and automatically configure for a trading relationship with the first trading partner using the configuration details (col. 8, lines 10-67).

23. As to claim 16, Gregory teaches a system as recited in claim 15, wherein the first computer system hosts the Web site (col. 8, lines 26-35).

24. As to claims 21 and 26, they have similar limitations to claim 3 and are thus rejected on the basis as claim 3.

25. As to claims 22 and 27, they have similar limitations to claim 15 and are thus rejected on the same basis as claim 15.

26. As to claims 28 and 29, the limitations for claims 28 and 29 are included in claim 27.

Therefore, the same rejection applies.

Claim Rejections - 35 USC § 103

27. The following is a quotation of 35 U.S.C. 103(a) which forms the basis for all obviousness rejections set forth in this Office action:

(a) A patent may not be obtained though the invention is not identically disclosed or described as set forth in section 102 of this title, if the differences between the subject matter sought to be patented and the prior art are such that the subject matter as a whole would have been obvious at the time the invention was made to a person

Art Unit: 2142

having ordinary skill in the art to which said subject matter pertains. Patentability shall not be negated by the manner in which the invention was made.

28. Claims 12 and 18 are rejected under 35 U.S.C. 103(a) as being unpatentable over U.S. Patent Number 6,490,567 to Gregory.

29. As to claim 12, Gregory teaches a method of publishing configuration details; however Gregory does not teach the use of an XML format to publish the details.

Official notice is taken that it is well known in the Information Technology art to publish information to a web site using an XML format.

It would have been obvious to one of ordinary skill in the Information Technology art at the time of the invention to combine the teachings of Gregory regarding a trading system with an XML display format because XML provides more extensibility than other display formats.

30. As to claim 18, it is rendered obvious by Gregory for the same reasons discussed in the rejection of claim 12.

31. Claims 31 and 33-39 are rejected under 35 U.S.C. 103(a) as being unpatentable over U.S. Patent Number 5,812,669 to Jenkins et al. in view of U.S. Patent Number 6,490,567 to Gregory.

32. As to claim 31, Jenkins teaches the method of claim 30, however Jenkins does not teach the use of a URL for accessing configuration details.

Gregory teaches a method wherein retrieving configuration details comprises addressing a URL to access the configuration details of trading partners (col. 8, lines 26-35).

It would have been obvious to one of ordinary skill in the Computer Networking art to combine the teachings of Jenkins regarding the configuration of a trading relationship with the teachings of Gregory regarding accessing a URL to retrieve trading configuration details because a URL allows a conventional browser to access the details.

Art Unit: 2142

33. As to claim 33, Jenkins teaches a method for establishing a trading relationship between first and second trading partners involved in electronic commerce, the method comprising: collecting first and second configuration details associated with the first and the second trading partners, respectively (col. 20, lines 10-48); publishing the first and second configuration details (col. 20, lines 49-65); creating, at the second trading partner, a trading partner record for the first trading partner (col. 20, lines 10-48); creating at the first trading partner, a trading partner record for the second trading partner (col. 20, lines 10-48); retrieving the configuration details associated with the first trading partner (col. 20, lines 10-65); retrieving the configuration details associated with the second trading partner (col. 20, lines 10-65); populating the trading partner record of the second trading partner with the configuration details associated with the first trading partner (col. 6, lines 4-42); and populating the trading partner record of the first trading partner with the configuration details associated with the second trading partner (col. 6, lines 4-42); however Jenkins does not explicitly teach the use of a Web site to publish and retrieve configuration details.

Gregory teaches the use of a Web site to publish and retrieve configuration details for a trade relationship (col. 8, lines 26-35).

It would have been obvious to one of ordinary skill in the Computer Networking art to combine the teachings of Jenkins regarding the configuration of a trading relationship with the teachings of Gregory regarding the use of a Web site for accessing configuration details because a Web site allows a conventional browser to access the details.

34. As to claim 34, Gregory teaches a method wherein collecting comprises presenting a graphical user interface to enable a user to enter the configuration details.

35. As to claim 35, it is rendered obvious by the Jenkins-Gregory for the same reasons discussed in the rejection of claim 12.

36. As to claim 36, Jenkins teaches a method wherein publishing comprises the first configuration details at a first site associated with the first trading partner and the second configuration details at a second site associated with the second trading partner (col. 20, lines 10-65); however Jenkins does not explicitly teach the use of a Web site to publish and retrieve configuration details.

Gregory teaches the use of a Web site to publish and retrieve configuration details for a trade relationship (col. 8, lines 26-35).

For discussed in the rejection of claim 33 it would be have been obvious at the time of the invention to combine Jenkins with Gregory.

37. As to claims 37 and 38, Gregory teaches publishing configuration details to a URL and retrieving configuration details from the URL.

38. As to claim 39, Jenkins teaches a first computer system at a first trading partner; a second computer system at a second trading partner (col. 20, lines 10-65); the first computer system collecting first configuration details associated with the first trading partner and publishing the configuration details to a first site (col. 20, lines 10-65); the second computer system collecting second configuration details associated with the second trading partner and publishing the configuration details to a second site (col. 20, lines 10-65); the first computer system retrieving the second configuration details from the second site and automatically configuring for a trading relationship with the first trading partner using the second configuration details (col. 6, lines 4-42); and the second computer system retrieving the first configuration details from the first site

Art Unit: 2142

and automatically configuration for a trading relationship with the first trading partner using the first configuration details (col. 6, lines 4-42); however Jenkins does not explicitly teach the use of a Web site to publish and retrieve configuration details.

Gregory teaches the use of a Web site to publish and retrieve configuration details for a trade relationship (col. 6, lines 37-54).

For discussed in the rejection of claim 33 it would be have been obvious at the time of the invention to combine Jenkins with Gregory.

Conclusion

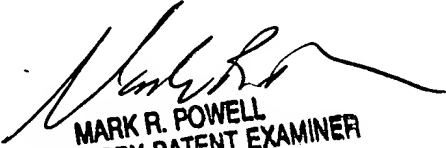

39. Any inquiry concerning this communication or earlier communications from the examiner should be directed to Douglas B Blair whose telephone number is 703-305-5267. The examiner can normally be reached on 8:30am-5pm Mon-Fri.

If attempts to reach the examiner by telephone are unsuccessful, the examiner's supervisor, Mark Powell can be reached on 703-305-9703. The fax phone numbers for the organization where this application or proceeding is assigned are 703-746-7239 for regular communications and 703-746-7238 for After Final communications.

Any inquiry of a general nature or relating to the status of this application or proceeding should be directed to the receptionist whose telephone number is 703-305-3800.
